About Us

Technology is not only what we build. It is how an idea becomes something people can use.

Hosting, domains, search visibility, design and software — the digital services your business runs on, from one team you can reach.

We help businesses take their place online: a reliable home for their website, a name of their own, visibility where customers search, and tools that make daily work simpler.

Arsh brings hosting, domains, search optimisation, design, software and its own products under one roof, so a business has one partner for everything digital.

Mission & Vision

Our Mission

We deliver reliable technology solutions that empower businesses, streamline operations, and drive growth. From hosting and domain services to custom software, we make tech work for you.

Our Vision

To become the globally recognized standard for innovative digital transformation, building smarter futures and connecting people through seamless, scalable technology ecosystems.

How we work

The same three steps behind every project we take on.

We shape every service around what your business needs. From the first conversation to launch and the support that follows, every step is handled with care and attention to detail.

1 **Understand**

The business first, the brief second.

2 **Deliver**

The right service, set up properly.

3 **Scale**

Built for the load you have not reached yet.

Why Arsh is The Right Choice for You

Expertise & Professionalism

Our team brings years of experience in web and mobile development, delivering custom and efficient solutions.

Scalable Solutions

All services are designed with scalability in mind to meet your business needs now and in the future.

Dedicated Support & Consultation

Our dedicated experts are always available to provide tailored advice and guide you through digital transformation.

Security & Reliability

We prioritize data security and system reliability with modern standards and continuous monitoring.

Services

Hosting and domains, search and AI visibility, design, software and our own products — everything a business needs to grow online, from one team.

Transform your ideas into powerful, efficient, and scalable software solutions. We deliver end-to-end development services tailored to your business goals.

- Web Application Development
- Mobile Application Development
- Software Development

Our Products

Yawar — your smart business companion

Yawar is a family of web-based management systems by Arsh, each built for one kind of business. It brings administrative, financial and communication work into one organised place — nothing to install, usable from any device, in Dari, Pashto and English.

Schools & kindergartens

Students, attendance, grades, fees and finance, and reports.

Goldsmiths

Gold weight and purity, the daily gold rate, purchases and sales, wages, inventory and accounting.

Auto repair shops

From vehicle intake to delivery: repair history, spare parts and invoices.

Hospitals & clinics — coming soon

Patients, appointments and health records. In development.

Our Impact

Numbers that tell the story of what we have built together with our clients.

6+ **Years of building**

Projects Done **47+**

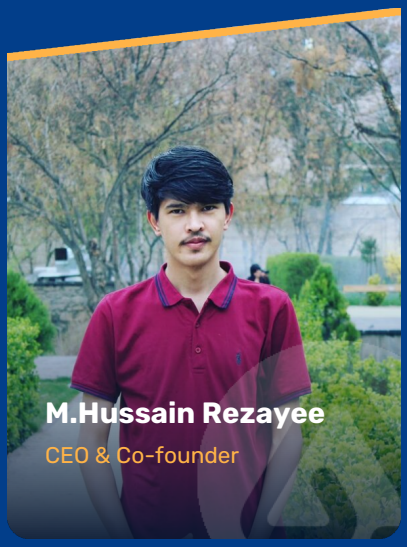

99+ **Major Clients**

Team Members **13+**

Meet Our Team

Our team is a group of technology enthusiasts and problem solvers. With expertise in hosting, software, apps, and database management, we bring innovation and reliability together.

A partner, not a vendor

Since 2020 we have kept our clients online, findable and growing — and stayed: to support them, improve what we set up, and answer for it.

We build it. We run it. We answer for it.

Hosting & domains **SEO, AEO & GEO** **UI/UX Design** **Software Development** **Yawar**

Businesses that trust us

Our philosophy

Smarter Tech
Simpler Life

Ideas evolve into innovation

We are more than a team — we are your technology partner, dedicated to building smarter digital futures.
